Frontend:

① path

Submit → on click → v0/submit

④ app.js

③ table_data.js

② db.js

⑤
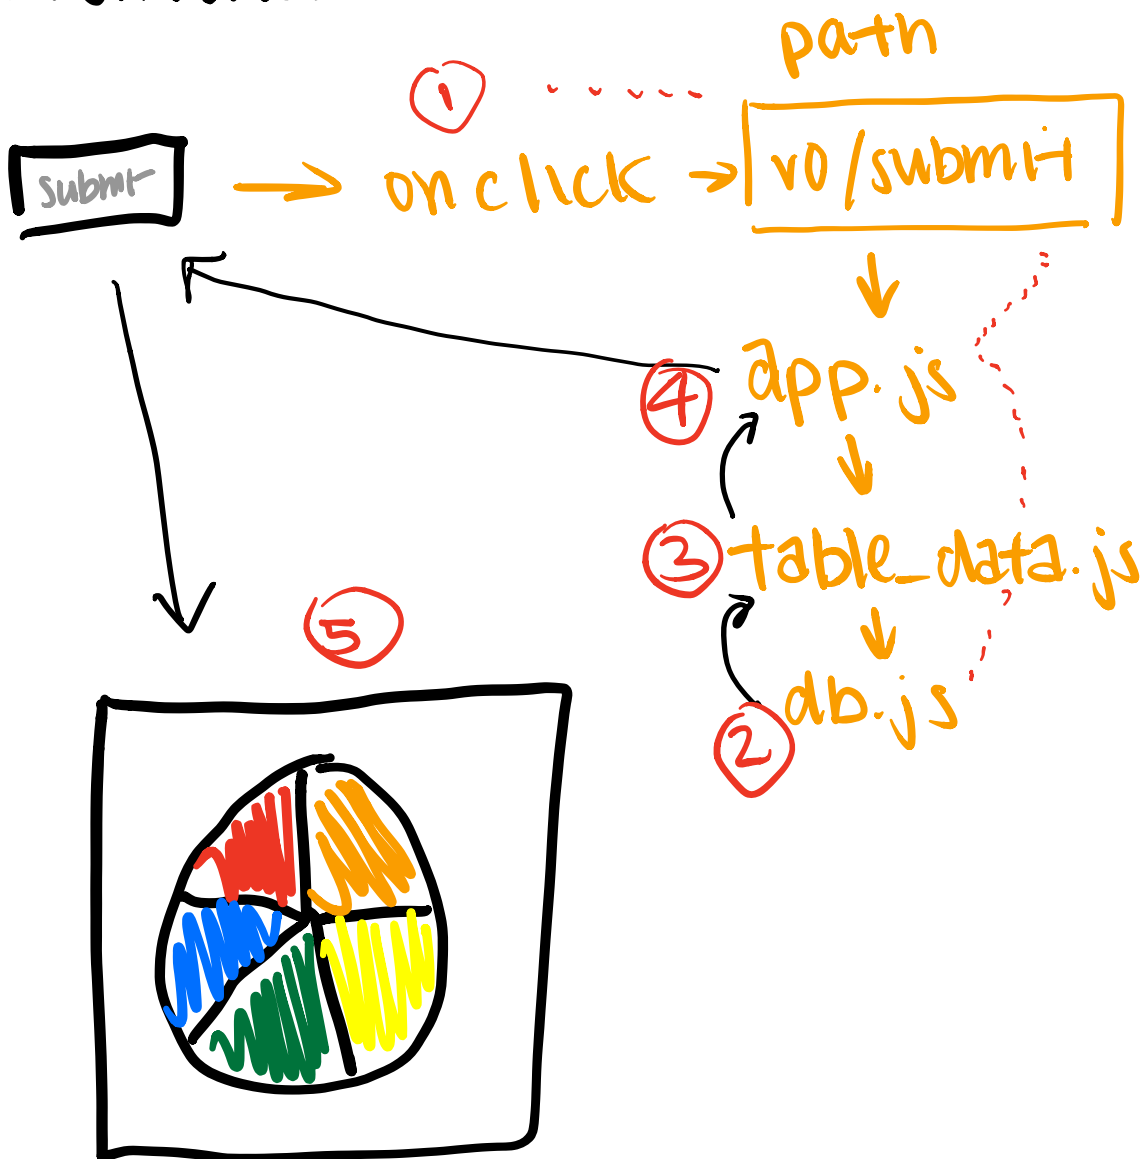

Backend.

- paths + function calls

```
app.js
```

- ties paths + functions so frontend can call queries

- 200/404/400 status
- db function calls

```
table_data.js
```

- validates returned data from db via 200 or 404

- aws credentials
- queries

```
db.js
```

- connects to aws
- queries are written here

- port: 3010

```
server.js
```

- connects to 3010 for query testing
